INSTRUMENTS AND CONTROL SYSTEMS

I AND CS

INDEX TO INSTRUMENTS AND CONTROL SYSTEMS VOLUME 45, 1972

This index is a guide to the subjects, titles, and authors of all articles published during 1972. The numbers in bold face type refer to the month of the issue, followed by the page type.

SUBJECTS

Acoustic **8**:27; **10**:29
Analog **2**:13, 111; **7**:55; **9**:67, **11**:4; **12**:37
Analytical **1**:75; **2**:91; **3**:101, 106; **4**:23, 27; **5**:4; **7**:9; **9**:29, 63, 72; **10**:61

Calibration **3**:115; **9**:72; **10**:49, 53, 55, 61
Communications **1**:99; **2**:101; **5**:33; **7**:39; **12**:15
Components **1**:99, 105; **2**:33, 37, 42, 44, 81, 87, 93, 107, 115; **3**:45, 106, 110; **4**:39, 57, 62, 88; **5**:15, 74, 80, 99, 105; **6**:43, 46, 73, 80, 83; **8**:35, 37, 78, 81; **9**:67, 75, 80, 87, 91, 97; **10**:25, 35; **11**:35, 41, 89; **12**:21, 23, 37, 55, 63
Computer **1**:15, 25, 33, 39, 84, 93; **2**:9; **3**:9, 84, 93; **4**:13, 29, 33, 81; **6**:25, 37; **7**:4, 13, 27; **8**:13, 15, 31; **9**:39, 63, 100; **10**:17, 49, 63; **11**:61, 65; **12**:9, 33, 80
Control **1**:11, 13, 15, 25, 27, 33, 39, 43, 45, 48; **2**:4, 9, 13, 15, 25, 33, 37; **3**:27, 29, 33, 84, 110; **4**:9, 15, 21, 33, 39, 40, 54, 62, 70; **5**:9, 13, 27, 31, 61, 74, 85, 95, 108; **6**:13, 25, 29, 37, 43, 61, 65, 77; **7**:9, 15, 27, 59; **8**:9, 23, 27, 29, 31, 38, 53; **9**:9, 13, 33, 37, 39, 83, 91; **10**:9, 17, 19, 25; **11**:9, 27, 29, 33, 35, 41, 61, 65, 68, 72; **12**:23, 27, 33, 37, 55, 57, 80
Data **1**:99; **2**:115; **5**:95; **6**:83; **7**:15, 39, 51, 65, 69; **9**:45, 83; **10**:17; **11**:79
Digital **1**:84; **2**:9; **3**:9, 33, 35, 84, 93; **4**:13, 15, 29, 33; **5**:37, 61; **6**:9, 37, 65; **7**:4, 15, 39, 51, 59; **8**:13, 15, 31; **9**:39, 45, 75, 100; **11**:4, 79
Display **2**:41, 93; **3**:4, 48; **5**:37; **7**:40, 55, 69; **8**:63; **10**:63; **11**:79

Electronic **1**:45; **2**:41, 44, 81, 87, 93, 115; **3**:13, 29, 48, 115; **4**:39; **5**:9, 13, 15, 74, 85, 99; **6**:9, 43, 48, 80, 83; **7**:40, 65; **8**:13, 37; **9**:67, 75, 80; **10**:57, 67; **12**:15, 63
Environmental **1**:27, 105; **2**:15, 21; **3**:27, 101; **4**:23, 27; **5**:31; **6**:29; **7**:31; **8**:27, 29, 73; **9**:29; **10**:19; **11**:33, 68; **12**:15, 27

Fluid **1**:11, 48; **4**:9, 40, 62, 70; **6**:13; **7**:9; **8**:9, 29, 53, 57, 63; **9**:9, 37, 41; **10**:9, 35; **11**:9, 72, 75
Fluidics **4**:57; **11**:35

Hardware **1**:25, 43; **3**:35, 93; **4**:70; **6**:48, 61, 77; **7**:13; **8**:23, 53, 57; **9**:100; **10**:53; **11**:72, **12**:9, 21, 27, 57

Information **3**:4, 35; **4**:13; **9**:4
Instrumentation **1**:13, 39, 45, 75, 105; **2**:15, 21, 41, 81, 87, 91, 101, 107, 111; **3**:13, 25, 39, 115; **4**:4, 23, 27, 40; **5**:15, 33, 37, 67, 80, 89, 105; **6**:4, 9, 19, 73; **7**:31, 33, 40, 55, 69; **8**:9, 23, 35, 38, 63, 73, 78; **9**:13, 41, 45, 72, 87, 91, 97; **10**:4, 13, 29, 35, 49, 55, 57, 61, 67; **11**:13, 25, 27, 29, 33, 75, 89; **12**:19, 21, 23, 57, 63, 66

Mathematical **1**:4, 48; **2**:4; **4**:54, 88; **5**:9, 95, 108; **8**:4; **12**:4
Mechanical **1**:43; **2**:25, 111; **3**:13, 29, 110; **4**:21, 81, 88; **5**:13, 27; **6**:25, 46, 61, 65, 77; **7**:27; **8**:23, 81; **9**:33, 80, 83, 87; **10**:53, 67; **11**:27, 41; **12**:33, 55, 66

Optical **2**:42, 91, 101; **5**:33, 67, 89, 99; **7**:65; **8**:37, 73, 81; **9**:97; **11**:75

Process **1**:11, 33, 75, 93; **2**:13; **3**:27, 101; **4**:9, 57; **5**:61; **6**:13; **7**:51, 59; **8**:38; **9**:29, 33; **10**:25; **11**:61, 65, 68; **12**:66, 80

Simulation **1**:4, 84; **2**:4; **4**:54, 81; **5**:108; **8**:57; **9**:83; **10**:63; **11**:4; **12**:4
Software **1**:15, 93; **3**:9; **4**:29; **7**:13; **8**:15; **12**:9
Standards **1**:13, 27; **10**:57

Thermal **2**:107; **3**:45, 106; **5**:4, 67, 80, 85, 89, 105; **6**:80; **8**:78; **10**:55; **11**:89

TITLES

Air Quality: Boom in Equipment Purchases **12**:27
Analog Analysis of a Tracked Air Cushion Vehicle **4**:81
Analog Multiplier Applications **6**:83
Analog Simulation of a Gas Pressure Regulator **4**:62
Applications of Voltage-to-Frequency Converters **6**:43
Associative Memories **3**:35
Atoms of Fire **5**:4
Automatic Voice Recognition **10**:29
Automating Tank Inventory at Challenge Foods **9**:37

Balance of Payments: Trade and Investments **9**:25
Batch Process Control with Minicomputers **11**:65
Batch Reactor Control System **1**:11
Biscuit, a Box of Mixed Biscuits, and a Biscuit Mixer, A **8**:35
Blending System Startup and Shutdown **4**:9
Boosting Export Sales **3**:25
Buying NC: Eenie, Meenie, Minie, and Moe Must Go **1**:43

Calibrating DPMs in Engineering Units **5**:37
Calibrating Platinum Resistance Thermometers **10**:55
Changes for OSHA **9**:27
Characterizing Thermoelectric Generators **5**:85
China Trip, The **4**:19
Clean Air Act: Implications for Industry **1**:27
Closed and Open Loops Increasing the Options **3**:29
Closing the Loop with Digital Valves **8**:53
Computer-Aided Manufacturing **10**:17
Computer Control at St. Regis Paper **1**:33
Computer Control: South Florida **4**:33
Computer Control Systems: Ready or Not **8**:31
Computer System: An Evolving Resource, The **3**:84
Computerizing Traffic Control **6**:37
Computers in Process Control: A Growing Maturity **5**:61
Continuing Education **7**:25
Continuously-Variable Humidity Reference, A **10**:61
Controlling Surge-Tank Level **9**:9
Controlling Variable-Period Once-Through Processes **11**:9

Decreasing Lead Times **8**:23
Design of a Resonant Pressure Sensor **10**:35
Dew Point Condensate Detector **2**:91
Difficulties in Controlling pH **7**:9
Digital Control in 28 Days **9**:39
Digital Panel Meter Operation **2**:41
Digital Panel Meter Survey **2**:93
Digital Process Controllers **12**:85
Disposing of Solid Wastes: A Mountainous Problem **5**:31
Dollar Standard, The **7**:25
Domestic Lend Lease: Unfair Competition **10**:15
DVM As a Measurement System, The **7**:40

Economic Growth and the Environment **9**:27
Effect of Impurities on the Thermoelectric Properties of Platinum **3**:106
Effect of Inlet Pressure on Regulator Performance **11**:72
Electromechanical Level Indicator, An **4**:40
End Point Control of Batch Processes **2**:13
Energy, Fuel, and the Environment **3**:27
Energy, Information, and Impedance **9**:4
Enigma of Liquid Level Control **8**:9
EPA Technology Transfer Program **8**:29
Estimating Errors in Experimental Data **5**:95
Estimating the Vulnerability of Computers to Lightning **9**:100
Extending the Range of Seismic Transducers **2**:111
Extending the Versatility of Graphic Recorders **7**:55

Fall Joint Computer Conference **1**:25
Feedback **4**:54
Flash Tube Timing Circuits **8**:37
Flow Measurement in Britain **9**:41
Fluidics: Alive and Well But Incognito **11**:35

Galatea **7**:4
Gas Chromatography: Out of the Lab and into the Plant **5**:124
Gasoline Internal Combustion: The Alternatives **10**:19
General-Purpose Utility for Data Acquisition and Control, A **7**:15
Generating High Reynolds Number Flows **8**:57
Government Funding of R & D **3**:25
Government R & D: What's in It For Industry **6**:19
Grounded Thermocouple Circuits **8**:78
Growth of NC around the Globe **2**:25
Guide to Memory Selection **3**:93
Guide to Selecting Automatic Weighing Systems **12**:66
Guide to Selecting Circular Chart Recorders **7**:69
Guide to Selecting Dial Pressure Gages **8**:63
Guide to Selecting Digital Printers **11**:79
Guide to Selecting IR Pyrometers **5**:89
Guide to Selecting Numerical Controllers **8**:65
Guide to Selecting Relay Testers **9**:91
Guide to Selecting Vibration Test Equipment **10**:67

Helping the Railroads **5**:25

1972 ISA Show: Impetus for Change **12**:23
ISA Show: Annual or Biennial **3**:39
Improved Capacitance Gage for Dimensional Measurements, An **6**:73
Increasing the Sensitivity of Thin-Film Gages **5**:105
Incremental Cassette Recorders for Data Acquisition **9**:45
Industrial Weighing: Automated, Fast, and Accurate **9**:108
Innovation and Status Quo **10**:4
Instrumentation for Emission Monitoring **2**:21
Instrumentation Magnetic Heads **2**:115
Instrumentation: the Key to Environmental Control **2**:15
Interactive Computer Simulation **10**:63
Is Firmware the Key to Application-Oriented Programming? **4**:29

Japan and the Common Market **9**:25
Japan: Dulling the Edge **6**:25
Justifying Automatic Calibration Systems **10**:49

Labor vs. Management **2**:31
Linearizing Relative Humidity Instruments **9**:72
Longer Words at Lower Cost **8**:90
Long-Term Effects of Air Pollution, The **6**:29
Low-Cost Automation in the United Kingdom **2**:37
Low-Level Television Systems **3**:48

Matrix Board Programming **1**:45
Measuring Nanovolts with Low-Cost DVMs **3**:115
Measuring Transient Current Loading of Power Supplies **6**:48
Meet Your Chief Engineer: Uncle Sam **1**:16
Metamorphosis, The **8**:4
Methods of Calibrating Weights **10**:53
Microwave Sensing for Earth Surface Measurements **1**:105
Models and Prototypes **11**:4
Modulating Lasers for Information Transmission **5**:33
Monitoring and Control Using the Switched Telephone Network **7**:39
Monitoring Sulfur Dioxide **4**:23
Multilevel Process Management and Control **6**:97

NC and Inspection **11**:27
NC and Productivity **6**:25

ICS Annual Index

NC and Productivity: Necessary for Survival 12:33
NC and Small Business 4:21
NC at the Machine Tool Forum 7:27
NC Lessons from the Army 5:27
Novum Organum 6:4
Noise in the Environment 8:27
Numerical Control from Computer Suppliers 11:93
Numerical Control Report 1:43; 2:25; 3:29; 4:21; 5:27; 6:25; 7:27; 8:23; 9:33; 10:17; 11:27; 12:33

Office Security 5:25
Operating System Flexibility for Digital Control 1:93
Operational Amplifier Nonlinearities 2:87
Opposition to Private Carriers 12:15
Optical Data Links for Industrial Communications 2:101
Optical Voltage Sensors 5:99
Optimizing Control Performance 5:9
Optimum Damping of Accelerometers 9:87
Overseas Instrument Markets: Robust and Growing 11:29
Ozonation: An Alternative to Chlorination 11:33

Paper and Pencil 3:4
Pension Plans 1:16
Pension Plans: Round Two 4:19
Phase III: Reset Winddown 2:31
Philosophy of Models, The 5:108
Pollution Control in the U.K. 4:27
Pollution Control Report 1:27; 2:15, 21; 3:27; 4:23, 27; 5:31; 6:29; 7:31; 8:27, 29; 9:29; 10:19; 11:33; 12:27
Private Pension Plans: Debate Continues 10:15
Process Models for Controller Tuning 1:84
Product Liability: Let the Vendor Beware 12:21
Productivity and Automation 1:39
Protectionism 8:21
Pumping Techniques for Advanced Lasers 9:97

Quality, Fact, and Law 2:4

Radioactive Wastes: Long-Term Pollutants 11:33
R & D: The White House View 6:23
Rapid Response Miniature Gas Thermocouple, A 3:45
Rating Circuit Protective Devices 5:74
Reassigning Responsibility 12:15
Reconstruction Errors in Digital-to-Analog Converters 1:99
Removing Sulfur Dioxide from Stack Gases 9:29
Removing Sulfur Dioxide by Carbon Monoxide Reduction 3:101
Representation, Interpretation, and Objects 1:4

Sampled Data Control 3:33
Selecting and Maintaining Thermocouples 11:89
Selecting Motors for Incremental Applications 3:110
Selecting Unsteady Heat Flux Sensors 5:80
Self Regulating Processes 6:13
Servo Characteristics of Hysteresis Synchronous Motors 6:77
Signal Transmission: Multiplexing for Economy 10:73
Solenoid Valve Selection Guide 4:70
Solid-State Voltage Standards 10:57
Solving Equipment Problems with Terminated Inventories 12:57
South Africa and Australia Rising Markets 7:33
Specifying Punched Tape 6:46
Stabilizing Techniques for Holographic Recording 7:65
Stepping Motors for Numerical Control 8:23
Structural Isolation of a Constrained Diaphragm 4:88
Survey of Humidity and Moisture Instrumentation 1:75
Synchros and Resolvers for Numerical Control 6:61

Tax Reform and Business Incentive 8:21
Technology Transfer: Making it Work 12:19
Terminology for IC Specification 2:44
Theory vs Practice 4:4
Trade with Russia 11:25
Trade Practice Rules 11:25
Trends in Factory Automation 9:33
Trends in Process Control Equipment 10:25
Triaxial Accelerometer System, A 9:80
Two-Capacity Variable-Period Processes 10:9

Understanding and Applying Strain Gages Part I: Sensing Elements 12:55
Understanding Corona Discharges 2:81
Understanding DC Instrumentation Amplifiers 9:67
Understanding Optical Filters 2:42
Understanding Process Transmitters 8:38
Understanding Thermocouples and Pyrometers 5:38
Understanding Wire-Wound Potentiometers 12:63
Universal Model, The 12:4
Using Analog Computers to Design Gas-Liquid Reactors 9:63
Using Analog Function Modules for Measurement and Control 12:37
Using Complementary MOS Circuits for Control Instrumentation 9:25
Using Condensing Steam for Air Cleaning 11:68
Using Correlation to Identify Process Dynamics 7:59
Using Data Adjustment 7:51
Using Dedicated Computers for On-Line Process Control Part I: Process Model 11:61
Using Dedicated Computers for On-Line Process Control Part II: System Description 12:80
Using Fluidics to Control Continuous Blending 4:57
Using Lasers for Flow Measurement 11:75
Using Lasers to Monitor Stacks Emission 8:73
Using Microwave Techniques for High Temperature Measurement 2:107
Using Operational Amplifiers for DC Servo Control 4:39
Using Ring Lasers as Rate Sensors 8:81
Using Selsyns for Remote Control and Data Transfer 9:83
Using Semiconductor Sensors for Linear Thermometers 6:80
Using Static Relationships to Determine Control Strategies 1:48
Using Synchros in Solid-State Limit Switches 11:41

Vehicle Detection for Closed Loop Traffic Control 2:33
